

Hector Robles

Full-stack Web Developer

8 San Pablo St., Brgy. Kapitolyo Pasig City

+63-917 573 5851 | hjt.robles@gmail.com | <https://htrobles.github.io/portfolio>

I would like to contribute to your organization as a full-stack web developer, leveraging my ability to develop E-commerce web applications using readily available web frameworks. With my passion for learning, I will be able to take part in empowering your team with my newly found coding expertise. I am eager to learn and I do my best to understand what it is I am trying to learn. Having been working as a designer, it is innate in me to make my output look presentable and organized. I always try to work smart. I believe that it is beneficial for an employee and the company that no time and effort is wasted. This allows for better productivity and less resource allotment. I am confident with my skills as a developer and I am eager to apply them in work and learn more.

AREAS OF EXPERTISE

Hard skills

- Frontend: HTML, CSS, Sass
- Databases: SQL, MySQL, MongoDB
- Scripting Languages: PHP, JavaScript
- Frameworks: Bootstrap, Laravel, ReactJS, Express, Node.js

- Develop a static webpage with plain HTML, CSS and other frameworks.
- Use of Bootstrap and custom CSS with Sass.
- Mobile Responsive Design
- Technologies: Linux, Apache, HTML, CSS, Sass JavaScript, Bootstrap, JQuery

Inkwell Publishing Co., Inc. Website**2017 Nov**<https://inkwellphilippines.com>

- Develop a static webpage with plain HTML, CSS and other frameworks.
- Mobile Responsive Design
- Technologies: HTML, CSS JavaScript

EDUCATION

THREE MONTHS MONTHS INTENSIVE TRAINING COURSE | Zuit Coding Bootcamp, Metro Manila, PH

BACHELOR OF FINE ARTS IN ADVERTISING | Far Eastern University, Manila, PH

ABOUT ME

Quality time with my family has always been a priority for me. We are a family of gamers and artists. I love playing computer games with my wife and daughter. Aside from playing computer games, I also enjoy singing, watching sci-fi movies, reading manga, coding, and sketching which greatly influenced me in getting a Fine Arts degree.

I have always been a curious individual. I enjoy figuring out how something is made or how it works. My recommended youtube videos would mostly be "How it works", "Primitive Technology, DIY projects and two guys making huts with swimming pools in the forest.

My desire to be a software engineer roots back when I was in 6th grade. I discovered the map editor and I saw how I can use it to make interesting scenarios and campaigns with triggers and events. I guess I can say that was my first programming language.

I have always loved technology and art. As a creative person, they provide me avenues to express and produce my visions. And with today's technology, I can easily share my ideas and apply them in work.
